

ascende was ready for to go online in all of the rooms in his parisienne appartement
so was perma
they considered it not as exhibitionism but as a contribution to helping the human evolution
evolution in the sense of a being discovering the potential what lays in its genes plus to mix ones genes with other species to enhance ones own genetic treasure
a treasure what only grows with sharing

the afternoon before the going live morning
they went out into the parcs of paris to see how their skins would act and react being surrounded by trees and grass other people ...
they both dressed lightly to expose their skin to the sun and the flowing air
ascende lay down on the grass as soon he got into the parc, he loved it so much to feel the grass holmes touching his belly and back, his arms
it smelled of good soil and life
perma did dance
she moved using all kinds of animal typical turns
and watched her mind as when the urge to skin colour change would arrive as she let go of some logical mental dominance and give the emotions some free space in her aura
the people passing by did not especially react to the two, as it is quite usual for city parcs these days to have people enjoying laying themselves onto the grass, dance, sing or play instruments
perma felt the feeling to mask at times when some grumpy ones or ones with anger where running around or walking their stuff off
but then she kicked in with her compassion for all fellow beings, all my relatives
and the urge to hide gave way to more embracing and integrating emotions
it also changing her dance, depending on how she got watched

ascende loved dancing too, and he stood up from the grass to also move himself with singing in a low volume to himself
occasionally they met each other on the middle of the grass patch they made their playground
but they were not so much looking to dance together but explore their ways beside each other
faintly feeling knowing the partners presence but still giving each other the free space so each one could find its own accordance of feelings body sensations and thoughts in moving

although the appartement of ascende was with 300 sm2 sapcious enough for them both ... one high room with some curtains being installed to separate some spaces like bathroom
they could not dance the same way as in the parc
the flow of air in 40 meters height was different
its particles it brought with the scents
the sunlight only entering trough the windows at the side and on the roofs
the missing grass
although ascende managed to let the appartement be rebuilt according to his love for the outdoors
it came short of being the outdoors quite a bit
but still when they returned from the parc, having eaten some bananas and avocadoes, nuts and berries the bought in an organic shop on the way home... they felt in the mood to dance in the middle of the appartement where about 150m2 was empty, all the experiments, bioreactors, funghi grow chambers, aeroponic, tables with petri dishes, computers and more were near the walls
as there were no plants trees to dance with except the ones in pots and chambers
they took each other as the dance partners, it soon turning into kuschelrock slow dance fumbling eroticy aroused desire to taste each others juices

in the middle of this night at around 1 o clock ascende woke up to drink some water as he felt his mouth dry from smoking ganja thid evening
perma preferred to eat the dried cannabis flowers with some nuts and seeds together
chewing it 300 times at least so she could journey discover in her mouth all the flavour and signals to her synapses she got from the nuttyoilc thc rich juice she chewed it into
but she also was overdoing it like ascende this evening, being a bit nervous for tomorrow morning
so they both drank some water what ascende has specially constructed an apparatus for
on the top was a vessel with rocks, then below it a vessel with smaller rocks, with several following below gradually their size getting smaller untill it is sand
trough all the vessels the water poured into the top vessel can pass trough holes in the bottoms
to arrive in the collection chamber
them vessels being made from burnt clay
from the collection vessel it got again flowing down trough some artisticy spiritually channeled flow forming schalen where it gets some sort of natural movements
sometimes ascende found himself collecting the water with his hands forming a cup like and ascend the stairs to pour it onto the top rocks, being an exercise of both attention
not to loose a drop to the floor and admiring giving thanks to the being of water what allowed his system to interact with the surrounding environment
about once a day he took about 5 10 liter buckets full of water up the small stair to pour it onto the rocks

when they were drinking beside each other, looking at each other with amour and appreciation how they learnt to understand their inner connection to similar visions and soul aims... washing each others faces with water and kisses... ascende asked perma how long she thought they should stay in paris
he was kind of longing for greater outdoor times with wild places, when perma meant ... anytime from now we can go to my place in the sub tropical area she had built her permahut with garden
mmmh, ascende optimistically sounded, i could find someone to look after the hydroponics aeroponics and all the other alive things here
with only taking with the petri dishes what we could culture further at your place

perma... or we too leave them here someone from our supporters experimenting with them eventually...

ascende was interested too getting away from petri dish cages and bioreactors, all kind of encaging plants felt kind of less than ideals
him having read about the gardens of permaculturists what after several decades of tuning working the garden had found a self sustaining cultivated wild cycle with the only thing left to do for the human host or guest or patient... the receiving party... onlt thing left to do being to harvest the fruits when ripe

of course he wanted to continue with the research in the laboratory to create all the most marvellous semi-artificial or let us say manipulated cell tissue to cloth the androids in
but there would be others being so happy for three months staying and researching at his place, eventually they too would go the bio cell fusion way
enhancing themselves or they would stay more focussed on the advancements in the petri dishes, bringing in live cell printers and so on

yes, perma agreed, it might actually be for the best for the research phase before the crowdfunding
to get a couple of other dedicated enthusiasts in the team

and we two can follow our dream of on and in and in between sensual bodies growing.... touching lustfully each others allready cellfused skins, getting into near encounters with wild animals and plants
